

学术报告会 Seminar

题目	Business Finland uncovered: A new governmental company for innovation, export an invest in	
报告人	Dr. Mika Klemettinen Director, Digitalization Business Finland	
时间	2018年7月2日（星期一）下午 14:00-15:00	
地点	上海科技大学，信息学院 1 号楼 C 区 502 会议室（上海雾计算实验室）	

Abstract: In my talk, I will introduce the new Business Finland organisation and its targets, including the digitalisation area that I am responsible for. I will also give updates on national digitalisation, artificial intelligence and platforms economy activities.

Bio: Mika is a Digitalization Director at Business Finland with responsibilities covering 5G, Industrial Internet, Artificial Intelligence, Platforms Economy, New Space Economy and Smart Mobility programs as well as digitalization strategy. Mika holds a PhD degree in Data Mining and has more than 20 years of academic and industrial experience, e.g., from Nokia and EU collaboration as well as from wireless communications, IoT, BigData, MyData, artificial intelligence, intelligent solutions, cyber security and global collaboration. Mika is, e.g., a member of minister Lintilä's national artificial intelligence and digitalization steering group in Finland with the responsibility of facilitating the data and platform economy subgroup. Additionally, he is responsible for the Finnish government's national data policy preparation through running the artificial intelligence and data group.
